01

N4L INTERNET FILTERING

N4L provides domain-based filtering to block specific websites. Through N4L, students and teachers can have different rules for what websites they can access.

02

ADMIN SETTINGS

Admin settings provide user-based filtering to block specific content on shared devices. Various admin portals are available for each type of device in use.

03

PEDAGOGY & CLASSROOM SETUP

Pedagogy and Classroom setup are the most important protection for students. Teachers use the internet deliberately through task design and expectations.
